Basic Psychological Needs Scales

Scale Description

Central to self-determination theory is the concept of basic psychological needs that are assumed to the innate and universal. According to the theory, these needs—the needs for competence, autonomy, and relatedness—must be ongoingly satisfied for people to develop and function in healthy or optimal ways (Deci & Ryan, 2000). Many of the propositions of SDT derive from the postulate of fundamental psychological needs, and the concept has proven essential for making meaningful interpretations of a wide range of empirically isolated phenomena.

The Basic Psychological Needs Scale is a family of scales: one that addresses need satisfaction in general in one’s life, and others that address need satisfaction in specific domains. We include the work domain and the interpersonal relations domain. The original scale had 21 items concerning the three needs for competence, autonomy, and relatedness. Some studies have worked with only 9 items, namely, 3 items per subscale. Here, the general and the work versions of the scale have 21 items, whereas the interpersonal relations version has 9 items.

The Basic Need Satisfaction at Work Scale has been used most often (Deci, Ryan, Gagné, Leone, Usunov, & Kornazheva, 2001; Ilardi, Leone, Kasser, & Ryan, 1993; Kasser, Davey, & Ryan, 1992). The Basic Need Satisfaction in Relationships Scale was used in (La Guardia, Ryan, Couchman, & Deci, 2000). The Basic Need Satisfaction in Life Scale is currently being researched.

The Scales

Basic Need Satisfaction in General

Feelings I Have

Please read each of the following items carefully, thinking about how it relates to your life, and then indicate how true it is for you. Use the following scale to respond:

1
2
3
4
5
6
7
not at all true
somewhat true
very true

1. I feel like I am free to decide for myself how to live my life.
2. I really like the people I interact with.
3. Often, I do not feel very competent.
4. I feel pressured in my life.
5. People I know tell me I am good at what I do.
6. I get along with people I come into contact with.
7. I pretty much keep to myself and don't have a lot of social contacts.
8. I generally feel free to express my ideas and opinions.
9. I consider the people I regularly interact with to be my friends.
10. I have been able to learn interesting new skills recently.
11. In my daily life, I frequently have to do what I am told.
12. People in my life care about me.
13. Most days I feel a sense of accomplishment from what I do.
14. People I interact with on a daily basis tend to take my feelings into consideration.
15. In my life I do not get much of a chance to show how capable I am.

16. There are not many people that I am close to.

17. I feel like I can pretty much be myself in my daily situations.

18. The people I interact with regularly do not seem to like me much.

19. I often do not feel very capable.

20. There is not much opportunity for me to decide for myself how to do things in my daily life.

21. People are generally pretty friendly towards me.

**Scoring information.** Form three subscale scores, one for the degree to which the person experiences satisfaction of each of the three needs. To do that, you must first reverse score all items that are worded in a negative way (i.e., the items shown below with (R) following the items number). To reverse score an item, simply subtract the item response from 8. Thus, for example, a 2 would be converted to a 6. Once you have reverse scored the items, simply average the items on the relevant subscale. They are:

- **Autonomy:** 1, 4(R), 8, 11(R), 14, 17, 20(R)
- **Competence:** 3(R), 5, 10, 13, 15(R), 19(R)
- **Relatedness:** 2, 6, 7(R), 9, 12, 16(R), 18(R), 21

**Basic Need Satisfaction at Work**

**When I Am At Work**

The following questions concern your feelings about your job during the last year. (If you have been on this job for less than a year, this concerns the entire time you have been at this job.) Please indicate how true each of the following statement is for you given your experiences on this job. Remember that your boss will never know how you responded to the questions. Please use the following scale in responding to the items.
1. I feel like I can make a lot of inputs to deciding how my job gets done.
2. I really like the people I work with.
3. I do not feel very competent when I am at work.
4. People at work tell me I am good at what I do.
5. I feel pressured at work.
6. I get along with people at work.
7. I pretty much keep to myself when I am at work.
8. I am free to express my ideas and opinions on the job.
9. I consider the people I work with to be my friends.
10. I have been able to learn interesting new skills on my job.
11. When I am at work, I have to do what I am told.
12. Most days I feel a sense of accomplishment from working.
13. My feelings are taken into consideration at work.
14. On my job I do not get much of a chance to show how capable I am.
15. People at work care about me.
16. There are not many people at work that I am close to.
17. I feel like I can pretty much be myself at work.
18. The people I work with do not seem to like me much.
19. When I am working I often do not feel very capable.
20. There is not much opportunity for me to decide for myself how to go about my work.
21. People at work are pretty friendly towards me.

**Scoring Information.** Form three subscale scores by averaging item responses for each subscale after reverse scoring the items that were worded in the negative direction. Specifically, any item that has (R) after it in the code below should be reverse scored by subtracting the person’s response from 8. The subscales are:

- **Autonomy:** 1, 5(R), 8, 11(R), 13, 17, 20(R)
- **Competence:** 3(R), 4, 10, 12, 14(R), 19(R)
- **Relatedness:** 2, 6, 7(R), 9, 15, 16(R), 18(R), 21

***************

**Basic Need Satisfaction in Relationships**

Note: This questionnaire was designed for use with respect to need satisfaction in particular relationships. For example, it is to assess the degree to which a person experiences basic need satisfaction while relating to his or her spouse, or best friend, or mother, or children, or whomever. So, to use the questionnaire to assess need satisfaction in a relationship, replace the XXXXXXX with the relationship you are studying. Although we have never done so, you could try using it for relationships in general if that is the question that interests you.

**In My Relationships**

Please respond to each statement by indicating how true it is for you. Use the following scale.

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>not at all true</td>
<td>somewhat true</td>
<td>very true</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1. When I am with XXXXXXXX, I feel free to be who I am.
2. When I am with XXXXXXXX, I feel like a competent person.
3. When I am with XXXXXXXX, I feel loved and cared about.
4. When I am with XXXXXXX, I often feel inadequate or incompetent.
5. When I am with XXXXXXX, I have a say in what happens, and I can voice my opinion.
6. When I am with XXXXXXX, I often feel a lot of distance in our relationship.
7. When I am with XXXXXXX, I feel very capable and effective.
8. When I am with XXXXXXX, I feel a lot of closeness and intimacy.
9. When I am with XXXXXXX, I feel controlled and pressured to be certain ways.

**Scoring Information.** Form three subscale scores by averaging item responses for each subscale after reverse scoring the items that were worded in the negative direction. Specifically, any item that has (R) after it in the code below should be reverse scored by subtracting the person’s response from 8. The subscales are:

- **Autonomy:** 1, 5, 9(R)
- **Competence:** 2, 4(R), 7
- **Relatedness:** 3, 6(R), 8

**Theoretical Note.** There is something almost tautological about the statement that satisfying one’s need for relatedness in an interpersonal relationship with, say, your best friend would predict the quality of that relationship. Indeed, as would be expected, research has shown a strong relation between degree of satisfaction of the relatedness need in a particular relationship and the security of attachment and the quality of relationship with that partner (La Guardia, Ryan, Couchman, & Deci, 2000). However, the more interesting point is that security of attachment and the quality of relationships with particular partners is also predicted by the degree to which one experiences satisfaction of the need for autonomy and the need for competence within those partners.
